SUBJECTIVE ANSWER SHEET

Date : 5/7/2026

Student Name (In CAPITAL) : SAYUN ROY

Roll No: 2 3 3 4 0 5 8 2 Subject: PHYSICS

Class: 9th Batch: 64- NF211WA

Centre Name GGN-47

Invigilator's Name & Signature:

Phone No:

VIDYAPEETH

FOR OFFICE USE ONLY

Maximum Marks. :

Marks Obtained :

Name & Signature of Copy Checker:

$s = \frac{d}{t}$

$s \times t = d$

$t = \frac{d}{s}$

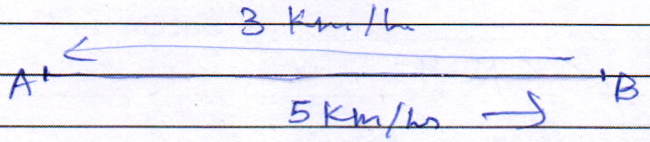

Section C.

Q14. D)

Q15.

Q16. A)

Q17.

Distance = D_1, D_2 (since distance is equal)

speed = 5 Km, 3 Km/hr

time = t_1, t_2

$t_1 = \frac{D}{5}$ $t_2 = \frac{D}{3}$

Avg. speed = $\frac{D+D}{\frac{D}{5}+\frac{D}{3}}$

$= \frac{2D^1}{D\left(\frac{1}{5}+\frac{1}{3}\right)}$

$= \frac{2}{\frac{1}{5}+\frac{1}{3}}$

$= \frac{2}{\frac{3+5}{15}}$

$= \frac{2}{\frac{8}{15}}$

$= \frac{2 \times 15}{8_4}$

$= \frac{15}{4}$ Km/hr

Avg. velocity = $\frac{\text{displacement}}{\text{time}}$

Since displacement is zero, velocity is also zero.

Q18

i) when acceleration is negative, it is known as retardation.

$u = 0\ m/s$

$v = 30\ m/s$

$t = 10\ seconds$

$$a = \frac{v - u}{t}$$

$$a = \frac{30 - 0}{10}$$

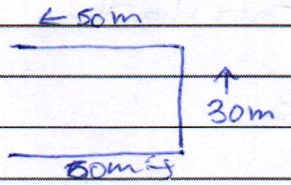

$$a = \frac{30}{10}$$

$$a = 3\ m/s^2$$

ii)

Scalar	Vector
→ has only magnitude	→ has both magnitude and direction.
→ For ex. distance, speed, energy, mass, etc.	→ For ex. Force, Velocity, displacement, etc.

Q19.

i) Distance of Rohan = 50 + 30 + 50
= 130m.

ii) Displacement = 30m ↑ direction
